Does anyone know which PDF can be downloaded so I can print it in A4? I understand vw's uk website has a directory for display but I can't find one that can be downloaded. I want to print it on the A4 and make a loose paper folder out of the result. I think car manufacturers will have to rethink the way they supply educational materials to cars as they become more complex and VW for this car included every possible indication for each country in one book making bloody hard work to follow in some areas. The more damned it is difficult to read because of the small type size and physical shape that was used. I feel like tearing everything up, scanning it and increasing the size of the page but it will be a lot easier on the PDF. Thanks for reading my dementia and I will now get off my soap box.
